IDENTIFIERS	*State University of New York

ABSTRACT

This study examined trends in attrition and retention of State University of New York students enrolled in both baccalaureate and associate degree programs. A cohort survival analysis was used to evaluate the relative success of the students. Data are based on full-time, first-time and transfer Fall enrollees from 1987 through 1992 and were collected in Fall, 1993. Highlights of the findings include: (1) most full-time, first-time students are taking 5 to 6 years to earn a degree; (2) White and Asian/Pacific Islander students have higher than average graduation rates; (3) more than 18 percent of full-time, first-time students complete an associate degree during the third and fourth years after enrolling; (4) the number of baccalaureate students who earn a degree within 4 years declined through the 1980s and has steadily increased in the 1990s; (5) the percent of associate degree-seeking students who earned degrees in 2 years declined in the 1980s and continues to decline. The vast bulk of the document presents study data in tables organized in four parts. Part 1 covers attrition, retention and graduation information for students in Baccalaureate degree program; Part 2 covers students in associate degree programs; Part 3 includes trend information on baccalaureate students from 1977 through 1993; and Part 4 provides similar trend information for associate degree students from 1977 through 1993. MAP OF STATE UNIVERSITY INSTITUTIONS 395

DATES OF ESTABLISHMENT OF SUNY INSTITUTIONS 396

PUBLICATIONS LIST 398

INTRODUCTION

This publication summarizes the responses of the State University of New York constituent institutions to the 1993 Attrition/Retention Survey (93-10) administered by the Central Office of Institutional Research. There have been many changes in the data collection procedures since the last publication, Report Number 4-92A, which reported attrition and retention data as of fall 1991. For the most part, SUNY Central Office of Institutional Research develops an institution's attrition and retention survey data from the Student Data File (SDF) and the Automated Degree File (ADF) submitted to us by the campus. Currently, Central OIR generates attrition/retention data for 18 state-operated institutions and 30 two-year institutions after each campus transmits their official Student Data File and Automated Degree File.

The significant factors in the development of a student's academic career and plans are varied and diverse; consequently, there are innumerable questions that may be asked regarding student retention and attrition. These questions are increasingly important to academic and fiscal planning and evaluation. Any study which involves the tracking of individuals over a period of time tends to be time-consuming and complex. Because of the desirability of designing a study that would yield significant information and still be capable of execution in a reasonable period of time, the questions formulated for purposes of this study have been restricted to those which could be answered by an examination of permanent records and transcripts. Within these restrictions, this study was designed to answer some fundamental questions of the groups examined, e.g., how many received awards and how many did not? Of those that received an award, when was the award received in terms of typical two-year or four-year expectations? Of those that did not receive an award, how many were still enrolled? In the case of associate degree programs, how many of those who received an award or did not receive an award and were no longer attending, transferred to another college? More detailed information on the design and assumptions of the study are found in the section titled "Methodology".

The data presented in this publication are reported as of the fall 1993 semester and include the groups of students listed below. There is one, new cohort for which data are being reported for the first time. Data for the associate cohort entering in 1992 as of 1993 allows for the reporting of first year attrition and retention data.

(a) six cohorts of full-time, first-time students in baccalaureate degree programs (fall 1987 - fall 1992), including racial/ethnic detail for the 1987 cohort;
(b) six cohorts of full-time, transfer students in baccalaureate degree programs (fall 1987 - fall 1992), including racial/ethnic detail for the 1987 cohort;
(c) one cohort of full-time, first-time postsecondary opportunity students by race and ethnicity enrolled in a baccalaureate degree program (fall 1987);

(d) four cohorts of full-time, first-time students in associate degree programs (fall 1989 - fall 1992), including racial/ethnic detail for the 1989 cohort;
(e) four cohorts of full-time, transfer students in associate degree programs (fall 1989 - fall 1992);
(f) one cohort of full-time, first-time postsecondary opportunity students by race and ethnicity enrolled in associate degree programs (fall 1989).

By incorporating several cohorts, attrition and retention rates may be examined without having to wait a full five or six years for baccalaureate cohorts or a full three or four years for associate cohorts. Racial/ethnic detail are provided for the following groups of students: White, Non-Hispanic; Black, Non-Hispanic; Hispanic; Asian and Pacific Islander; Native American and Alaskan Native and Non-Resident Aliens.

FORMAT OF THE ATTRITION AND RETENTION REPORT

This report is organized into four parts.

Part One provides attrition, retention and graduation information for the following students enrolled in a SUNY Baccalaureate Degree Program:

Full-time, first-time students entering in fall 1987, 1988, 1989, 1990, 1991 and 1992;
Full-time, first-time students entering in fall 1987 by race and ethnicity;

Full-time, first-time opportunity students entering in fall 1987 by race/ethnicity;

Full-time, upper and lower division transfer students entering in fall 1987, 1988, 1989, 1990, 1991 and 1992; and

Full-time, upper and lower division transfers entering in fall 1987 by race/ethnicity.

Part Two contains similar information for students enrolled in a SUNY Associate Degree Program.
Part Three includes baccalaureate trend data for the State University of New York institutions for full-time, first-time students, classes of fall 1977 through fall 1993. **Part Four** provides associate trend information for full-time, first-time students, classes fall 1977 through fall 1993.

All tables include headcount and percentage data from a SUNY system perspective, by institutional type and by campus.

ACKNOWLEDGEMENTS

The accumulation of information contained in this study involved a great amount of work on the part of individual campuses and of SUNY central staff. As the survey technology changes, extra efforts are needed today to produce more consistent data and in some sense "better" data with less labor, tomorrow. We appreciate the extra efforts that many of the SUNY campuses provided. We would like to mention Mr. Gary Blose and Mr. Craig Billie for their expertise in managing the SDF and the ADF respectively. We would like to thank Ms. Maria Sweincicky and her staff for their programming support in the continuing saga of automating the attrition survey. Ms. Cynthia Brinsmaid is recognized for developing data tables for the publication. Finally, we would like to thank Mrs. Kathy Bartoszwicz for her efforts in preparing this report for printing.

Dr. Catherine Regan, Associate
for Institutional Research

Tommy Annas, Assistant Provost
for Institutional Research

METHODOLOGY

The problem of "measuring" student attrition and retention in an instructional program is complicated by a number of factors some technical and some conceptual. Among the latter is the fundamental problem of defining the concept of attrition in an operationally significant manner. Regardless of its original meaning, the term 'attrition' as it is used within the context of higher education involves the concept of failure to achieve some goal or objective. It would, consequently, be improper to include within attrition figures a student who entered an undergraduate college and completed only one year of study if that student had no commitment to a program of study leading to a formal degree, or no commitment to a specific goal which was not achieved.

The **basic approach** utilized in this study was a **cohort survival analysis**, i.e., to identify, each fall, a group of full-time students enrolled in a degree program and to arrive at attrition/retention information by tracking the same cohort through the institution over time. The reason for selecting a cohort of full-time students enrolled in a degree program was that they, by virtue of their enrollment, expressed a commitment to definable objectives. Specifically, they were committed to (i) full-time study and (ii) attaining a degree. This study is organized so as to provide information regarding the relative success of the cohort in achieving their goals.

The study examines: (i) those students enrolled in baccalaureate degree programs, and (ii) those students enrolled in associate degree programs. If comparisons are made between the two cohorts, a word of caution is advisable. It should be remembered that a student who enrolls in a baccalaureate degree program and leaves the institution after two years without a degree, will be counted as failing to achieve his/her objectives. Whereas, a student enrolled in an associate degree program who receives a degree will have met his/her objectives. Yet, both students may have completed essentially the same course work and performed at essentially the same level of competence. Generally, a four-year institution does not give a formal degree for completing two years of study while a two-year institution does, thus, comparisons between the two cohorts with respect to ability and achievement should be made with caution.

Attrition/retention data in baccalaureate degree programs are based on full-time, first-time and full-time, transfer students who entered in fall 1987, fall 1988, fall 1989, fall 1990, fall 1991 and fall 1992. In addition, data were collected on full-time, first-time and full-time, transfer postsecondary opportunity students in baccalaureate Programs who entered in fall 1987. Each cohort was divided into those who received a degree, thereby achieving their baccalaureate educational objectives, and those who did not receive a degree. Of those who did not receive a degree, the number still persisting/still enrolled in the institution, either part-time or full-time, were reported. Degree recipients were reported in terms of the conventional four-year time frame, i.e. those graduating in less than four years, those graduating within four years after admission and those graduating later, during the fifth and sixth years. All data were collected as of the fall 1993 semester, therefore, many students in the most recent cohorts will be reported as persisters still enrolled.

It would be incorrect to infer that students who are no longer enrolled have abandoned their educational objectives. They may or may not have abandoned their original goals. All that is known for certain regarding the students who are no longer enrolled is that, for reasons which we do not have, their relationship with the institution has ceased. Again, a cautionary note, the reasons for leaving the institution may be many and varied, e.g., financial, academic, abandonment of original objectives, illness, desire to attend another institution, or any variety of personal and non-personal reasons. Consequently, inferences made from the data regarding students no longer enrolled should be made with caution.

Attrition/retention data in associate degree programs are based on full-time, first-time and full-time, transfer students who entered in fall 1989, fall 1990, fall 1991 and fall 1992. Additionally, data were collected on full-time, first-time and full-time, transfer postsecondary opportunity students in associate Programs who entered in fall 1987. The divisions of each cohort are similar but not identical to the divisions utilized for baccalaureate degree students. Consequently, the same cautionary notes apply. The major difference in the case of the associate degree programs is that additional information is provided regarding the number and distribution of students who transferred to another college. This additional information was sought in the case of the associate degree programs since many of these programs are designed to be university parallel programs leading to transfer to another institution.

In interpreting the data for attrition in associate degree programs, it should be noted that those students whose ultimate objective is to receive a baccalaureate degree may, because of limitations on the transferability of credits and other factors, perceive it to be in their best interest not to complete the associate degree program. Consequently, some students may not receive a formal award in a two-year program by prior design. In this instance, therefore, attention should be given to the students who do not receive an associate degree but do transfer to another college.

ORGANIZATION OF THE ATTRITION/RETENTION TREND DATA

Attrition/retention trend tables summarize the data collected by the attrition/retention surveys for full-time, first-time students enrolled in a SUNY baccalaureate and a SUNY associate degree program from the classes of fall 1977 through fall 1993. The trend tables allow attrition, degree completion and persistence data to be compared across the sixteen years of survey administration. Trend tables permit historic analyses of attrition and retention information by campus, by type of institution and on a SUNY-wide basis.

Since the attrition/retention survey format and data collection procedures were modified over the period of survey administration, ***two models have been developed to facilitate the understanding and the interpretation of the trend data. The model for baccalaureate programs immediately follows on page xiv and the other one for associate programs can be found on page xv.*** Each model contains information about the detail reported for the entering cohort, as well as source documentation, reporting years and times.

DEGREE RECIPIENT DATA - BACCALAUREATE PROGRAMS

At the baccalaureate level, the column labeled "WITHIN FOUR YEARS" includes degree data reported up to and during the summer of the fourth year of school or before the fall of the fifth year. The columns reporting the remaining degree data are followed by the word "PLUS" to underscore the fact that summer degree recipients are included in the data. The column labeled "FIVE YEARS PLUS" includes degrees earned during the fifth year of school plus the summer of the fifth year. The column labeled "SIX YEARS PLUS" includes degree data reported for the sixth year of school plus the summer of the sixth year after enrollment.

DEGREE RECIPIENT DATA - ASSOCIATE PROGRAMS

At the associate level, the column labeled "WITHIN TWO YEARS" includes degree recipients reported up to and including the summer of the second year of school or before the fall of the third year. The columns reporting the remaining degree data are followed by the word "PLUS" to underscore the fact that summer degree recipients are included in the data. The column labeled "THREE YEARS PLUS" includes degree data reported for the third year of school plus the summer of the third year. The column labeled "FOUR YEARS PLUS" includes degree data reported for the fourth year of school plus the summer of the fourth year after enrollment. Degree data reported in the same column are comparable across all of the included years.

ORGANIZATION OF THE ATTRITION/RETENTION TREND DATA - (Continued)

NON DEGREE RECIPIENT DATA - BACCALAUREATE AND ASSOCIATE PROGRAMS

Persisters and those who left an institution without a degree are reported as of the fall semester. Persisters in this study include those who are still enrolled and have not earned a degree. Continuous enrollment is not a condition for persistence, thus, students who are no longer "stop-outs" are included in the persistence data. Those who left an institution without a degree may return, or transfer to another institution or enter the workforce. Attrition and retention comparisons of data within the same column are possible.

SUMMARY OF DATA

This is the tenth Attrition and Retention publication of the Central Office of Institutional Research (see Appendix for Publications List). It reports the results of the 1993 Attrition/Retention Survey of the State University of New York. This publication also includes attrition and retention **trend** data for full-time, first-time baccalaureate and associate students, as well as racial/ethnic detail for full-time, first-time students, including opportunity students, entering a baccalaureate program in fall 1987 or an associate program in fall 1989.

PART ONE - ATTRITION AND RETENTION DATA SUMMARY FOR SUNY BACCALAUREATE STUDENTS

Part One presents **baccalaureate** information on the history of full-time, first-time and full-time, transfer students entering a SUNY institution in the fall of 1987 through fall of 1992. In addition, racial/ethnic detail are provided for first-time and transfer students entering in the fall 1987 semester and for postsecondary opportunity students enrolling for the first-time in fall 1987. Both headcount and percentage data are presented from a SUNY-wide perspective, by institutional type and by institution as of the fall 1993 semester.

BACCALAUREATE GRADUATION RATES FOR FULL-TIME, FIRST-TIME STUDENTS

Table 94/1507 indicates that 22,011 full-time, first-time students enrolled in a SUNY Baccalaureate Degree Program in the fall of 1987 (Class of 1991). Six years after admission, 58.84 percent (12,951 students) had earned a degree, 39.54 percent (8,704 students) had left an institution without a degree and 1.62 percent (356 students) were still enrolled. As shown, 40.06 percent of the entering 1987 cohort graduate in four years or less. During the fifth year, an additional 15.75 percent of the students entering in fall 1987 earned a degree, producing a 55.81 percent graduation level after five years. During the sixth year, another 3.03 percent of the entering cohort earned a degree, bringing the total baccalaureate completion rate to 58.84 percent for the students entering in fall 1987. The data demonstrate that during the fifth and sixth years after enrollment, nearly nineteen percent of SUNY full-time, first-time students complete a baccalaureate degree program. Clearly, full-time, first-time students are taking longer to graduate than the traditional four years for earning a baccalaureate degree.

Table 94/1507 also demonstrates that SUNY baccalaureate graduation rates vary by institutional type and by institution. On average, the Statutory Colleges have the highest overall 4th, 5th and 6th year completion rates (77.21, 86.35 and 87.97 percents) respectively, followed by the University Centers (44.26, 60.88 and 64.02 percents), and the University Colleges (33.49, 49.32 and 52.45 percents). It must be remembered that these percentages represent average graduation rates by SUNY institutional type and that there are significant differences in the completion rates of SUNY institutions within an institutional type. The graduation rates of full-time, first-time students entering a SUNY institution in fall 1988, 1989, 1990, 1991 and 1992 are available in Table 94/1507 for the SUNY System, by institutional type and by individual SUNY institution.

BACCALAUREATE ATTRITION RATES FOR FULL-TIME, FIRST-TIME STUDENTS

The first, second, third and fourth year attrition rates for SUNY baccalaureate institutions are indicated by the partial cohort data in Table 94/1507. The attrition rate of the fall 1992 cohort as of fall 1993 represents SUNY first-year attrition rate of 17.14 percent for full-time, first-time baccalaureate students. As shown, the drop-out rate after two years is 28.89 percent and estimated by the 1991 entering cohort as of fall 1993. On average, nearly twelve percent of the entering cohort leaves a SUNY institution without a degree during their second year. During the third year after enrolling, another 3.88 percent of the entering cohort drop-out, bringing the cumulative third year attrition rate to 32.77 percent as shown by the fall 1990 entering cohort. By the following fall, an additional 3.74 percent of the cohort leaves an institution without a degree, raising the four-year attrition rate to 36.51 percent. While these figures are indicative of SUNY baccalaureate attrition rates, it should be remembered that these data represent different cohorts at one point in time, rather than one cohort over time.

Since graduation and attrition rates are inversely related, i.e., institutions that report higher completion figures also report lower percentages of attrition. Thus, when SUNY institutions are ranked from low to high on sixth-year attrition by institutional type, we find that the Statutory Colleges (11.56 percent) have the lowest attrition, followed by the University Centers (34.11 percent) and next, the University Colleges (46.09 percent). SUNY institutions within an institutional type vary widely in their attrition and retention rates and should be examined on an individual campus basis.

BACCALAUREATE GRADUATION BY RACIAL/ETHNIC GROUP, INCLUDING POSTSECONDARY OPPORTUNITY STUDENTS

SUNY full-time, first-time baccalaureate graduation rates differ also by race and ethnicity. The racial/ethnic distribution of attrition and retention data for full-time, first-time students entering in the fall of 1987 are presented in Table 94/622 along with percentage data by racial/ethnic group and by attrition/retention category. The aggregated data for "All Baccalaureate Programs" does not include Empire State College and, therefore, the figures are slightly less than the aggregated data for the same group of students presented above in Table 94/1507. As shown, of the 21,987 students that enrolled in fall 1987, 17,967 (81.72 percent) are White (non-hispanic), 1,523 students (6.93 percent) are Black (non-hispanic), 817 students (3.72 percent) are reported as Hispanic, 956 of the students (4.35 percent) are Asian/Pacific Islander, 63 students (.29 percent) are identified as American Indians or Alaskan Natives, one percent or 217 students have Non-Resident Alien status and the racial/ethnic identity of 2.02 percent of the cohort (444 students) is unknown.

As Table 94/622 indicates, the overall completion rate for full-time, first-time students from this cohort is 58.88 percent. White (non-hispanic) and Asian/Pacific Islander students have higher than average graduation rates, 61.92 percent and 61.40 percent, respectively, while the remaining groups have lower graduation rates six years after enrollment. Hispanic students from this cohort graduate at a rate of 42.11 percent, Non-Resident Aliens have a 48.59 percent completion rate, Black (non-hispanic) students earn a degree at a rate of 36.70 percent and 41.27 percent of the American Indians and Alaskan Natives graduate with a baccalaureate degree. These data indicate that SUNY completion rates differ by race and ethnicity for full-time, first-time students enrolled in a baccalaureate degree program. The purpose of this study is to describe the completion patterns of different racial/ethnic groups in response to NYS reporting requirements. It is not an analysis of the reasons or causes for persistence versus attrition in NYS public higher education. The literature suggests many factors that could influence student persistence patterns at four-year institutions that were simply beyond the scope of this study. In particular, research on the role of student involvement in campus life, academic and social integration, student intentions to persist and quality of student, faculty and staff efforts could add to our understanding of persistence. This study, however, does provide a valuable description of persistence in SUNY baccalaureate institutions.

Further characterization of the racial/ethnic distribution and graduation patterns of SUNY **baccalaureate students enrolled in a postsecondary opportunity program** is presented in Table 94/623. As shown, there were 1,864 full-time, first-time students enrolled in an opportunity program in fall 1987. Six years later, 573 students (30.74%) earned a degree, 1,242 students (66.63%) left an institution without a degree and 49 students (2.63%) were still enrolled. Black (non-hispanic) students comprise nearly 42 percent of the full-time, first-time opportunity cohort, followed by White (non-hispanic) students (27.04 percent), Hispanic students (19.80 percent), Asian and Pacific Islander students (8.53 percent), with the remaining groups contributing less than one percent to the total cohort size.

The racial/ethnic distribution of the completion data from Table 94/623 indicates that Asian/Pacific Islander opportunity students graduate at a rate of 49.69 percent after six years, the percentage of Hispanic opportunity students who complete a degree is 32.25%, while 30.56% of the White (non-hispanic) opportunity students earn a degree and 27.11% of the Black (non-hispanic) students from this cohort graduate. The data illustrate that the completion rates are lower for opportunity students than for all full-time, first-time students from the 1987 entering cohort. However, differences in graduation between opportunity students and all students also vary by race and ethnicity. There is approximately a ten percent difference in completion patterns of opportunity students and all students from the Black (non-hispanic) and Hispanic cohorts entering in 1987 and a 25.32 percent difference for White (non-hispanic) students.

These percentages reflect the average of all SUNY baccalaureate degree programs and conceal the range of completion rates by race and ethnicity for individual SUNY campuses. If such information is desired, then further examination of the graduation rates presented by race and ethnicity in Tables 94/622 and 94/623 is recommended.

GRADUATION DATA FOR SUNY BACCALAUREATE TRANSFER STUDENTS

Table 94/1527 presents attrition and retention data for full-time, transfer students entering a SUNY institution in fall 1987, fall 1988, fall 1989, fall 1990, fall 1991 and fall 1992. As shown, the degree completion rate of full-time, transfer baccalaureate students from the fall 1987 entering cohort is 66.69 percent as of fall 1993. As expected, baccalaureate students transferring at the upper division level have the higher degree completion rate, 73.77 percent, while lower division transfers have a 59.02 percent degree completion rate six years after enrollment. Further examination of the cohort entering in fall 1987 indicates that most upper division students graduate within two and three years after enrollment. As displayed, 46.49 percent of the entering cohort earn a degree within two years and an additional 21.40 percent graduate during the third year. This means that sixty-eight percent of the upper division cohort earn a degree within three years after enrolling and subsequently, after four, five and six years, less than six percent earn degree.

At the lower division, transfers are more likely to earn a degree three and four years after enrollment. As shown by the cohort entering in fall 1987, 39.85 percent of the entering cohort earn a degree within three years and 54.11 percent graduate within four years. This means that less than five percent of all degrees are earned by the lower divsion transfers during the fifth and sixth year after admission. These figures represent the average graduation rates for full-time, transfer students in a SUNY Baccalaureate Program. Transfer graduation rates differ at individual SUNY campuses as further examination of Table 94/1527 will reveal.

GRADUATION DATA FOR BACCALAUREATE TRANSFER STUDENTS BY RACIAL/ETHNIC GROUP

Table 94/1194 presents the baccalaureate transfer data by race and ethnicity, separately for upper and lower division transfer students enrolling in the State University during the fall 1987 semester. At both levels, White (non-hispanic) students comprise the largest majority of transfer students, i.e., 86.89 percent of the upper division and 81.79 percent of the lower division transfers. Black (non-hispanic) students constitute only 3.40% and 5.28 percent of the upper and lower division transfers, while the remaining racial/ethnic groups comprise less than five percent of the upper division cohort and approximately eight percent at the lower division level. In general, full-time, transfer students have higher completion rates than full-time, first-time students and this observation is reliable when race and ethnicity are considered. The completion rates for transfer students, particularly at the upper division transfer level are higher than are the graduation rates for first-time students for all of the racial/ethnic groups included in this study.

As shown, full-time, upper division transfers have an overall completion rate of 74.24 percent which is approximately fifteen percent higher than the overall rate of 58.88 percent for full-time, first-time students. The graduation rate for lower division transfer students is less than one percent higher, 59.31 percent, than the completion rates for first-time students. When the racial/ethnic distribution of degrees is examined at the upper division transfer level, White (non-hispanic) students from this cohort graduate at a 75.62, while Asians/Pacific Islanders and Non-Resident Alien students have completion rates over 70 percent. Hispanic students graduate at a 67.57 percent and 61.72 percent of the Black (non-hispanic) transfers from this cohort graduate. These graduation rates are notable when compared to the rates for first-time students, especially for Black (non-hispanic) students and Hispanic students. There is approximately a 25 percent difference between the first-time and upper division transfer completion rates of Black (non-Hispanic) and Hispanic students, almost a fourteen percent difference in the rates for White (non-hispanic) first-time and transfer students and almost a ten percent difference for Asian/Pacific Islanders.

Caution must be used when interpreting these data because of the small numbers of minority students representing Hispanic, Asian and Pacific Islander, American Indian and Alaskan Native and Non-Resident transfer students. In addition, these percentages depict average transfer completion rates for all SUNY Baccalaureate campuses. Inter-institutional and intra-institutional graduation rates vary widely and may be found in the remainder of Table 94/1194.

PART TWO - ATTRITION AND RETENTION DATA SUMMARY FOR SUNY ASSOCIATE STUDENTS

Part Two presents attrition and retention information for full-time, first-time and full-time, transfer students in an **associate** degree program entering the State University in fall 1989, fall 1990, fall 1991 and fall 1992 as of fall 1993. Racial/ethnic detail are included for the full-time, first-time students enrolling in fall 1989. Data for postsecondary opportunity students are included in the attrition and retention tables for first-time students and are reported separately for full-time, first-time opportunity students by race and ethnicity for students entering in the fall 1989 semester. All tables present both descriptive and percentage data from a SUNY-wide perspective, by institutional type and by institution as of the fall 1993 semester.

GRADUATION, PERSISTENCE AND ATTRITION RATES FOR FULL-TIME, FIRST-TIME ASSOCIATE STUDENTS

As shown in Table 94/1508, there were 38,777 full-time first-time students enrolled in a SUNY associate degree program in the fall of 1989 (Class of 1991). An examination of the graduation data indicates that 14,600 of the students (37.65 percent) earned an associate degree after four years and that 12.75 percent of the original cohort or thirty-three percent of the degree recipients transferred to another institution. Since the data are reported as of fall 1993, the cohort entering in fall 1990 may be used to estimate the three-year SUNY associate graduation rate and likewise, students entering in fall 1991 and fall 1992 indicate the two-year and one-year completion rates, respectively. As shown, 31.13 percent of the entering cohort earn a degree three years after enrolling, 16.36 percent graduate within two years and less than one percent earn a degree during the first year after admission. More than eighteen percent of SUNY full-time, first-time students complete an associate degree program during the third and fourth years after enrolling. The data demonstrate that full-time, first-time students are taking longer than the traditional two years to earn an associate degree.

The extended persistence patterns also reflect that the two-year associate time frame is a phenomenon of the past. As shown, 29.46 percent of the full-time, first-time students are still enrolled after two years, more than ten percent of the entering cohort are still enrolled after three and roughly five percent continue enrollment four years after entry.

The partial cohort attrition data estimate the first, second, third and fourth year drop-out rate for SUNY associate institutions. As shown by the cohort entering in fall 1992, approximately 38 percent of the students leave without a degree during the first year after enrolling. After two years, the attrition rate rises to approximately fifty-four percent, as estimated by the fall 1991 cohort. During the third and fourth years, an additional two to four percent drop-out of a SUNY two-year institution. As shown by the cohort entering in fall 1989, of those who left the University without a degree, approximately twenty-six percent transferred to another institution which is nearly fifteen percent of the entering cohort.

Caution should be exercised when interpreting the transfer status of students who graduate and who leave an institution without a degree because not all two-year institutions provide transfer estimates. It is important also to remember that the data presented above portray different cohorts at one point in time, rather than one cohort over time. Consequently, data anomalies can occur between years that would not happen in a cohort survival analysis, e.g., the third year attrition rate is slightly higher than the fourth year rate. In addition, percentages reflect average rates across all SUNY institutions offering an associate degree program. Significant differences remain in the completion and persistence patterns of individual institutions within the SUNY System which are presented also in Table 94/1508.

ASSOCIATE GRADUATION BY RACIAL/ETHNIC GROUP, INCLUDING POSTSECONDARY OPPORTUNITY STUDENTS

The racial/ethnic distribution of attrition and retention data for full-time, first-time students entering a SUNY Associate Degree Program in fall 1989 are presented in Table 94/1186, along with percentage data by racial/ethnic group, as well as by attrition and retention categories. The aggregated data for "All Associate Programs" does not include Empire State College and, therefore, the figures are slightly less than the aggregated data for the same group of students presented above in Table 94/1508. As shown, of the 38,770 students that enrolled in fall 1989, 33,392 (86.13 percent) are White (non-hispanic), 2,267 students (5.85 percent) are Black (non-hispanic), 1,267 students (3.27 percent) are reported as Hispanic, 576 of the students (1.49 percent) are Asian/Pacific Islander, less than one percent of the students are identified as American Indians or Alaskan Natives (143 students) and as Non-Resident Aliens (370 students) and the racial/ethnic identity of 1.95 percent of the cohort is unknown.

As shown, 37.66 percent of the students entering in fall 1989 (14,599 students) earn an associate degree within four years. White (non-hispanic) and Asian/Pacific Islander students have higher than average graduation rates, 39.43 percent and 40.10 percent, respectively, while the remaining groups with larger numbers of students, have lower graduation rates four years after enrollment. The completion rate for Hispanic students from this cohort is 26.52 percent and Black (non-hispanic) students graduate at a rate of 21.61 percent. Non-Resident Aliens have a reported completion rate of 45.41 percent and, apparently, 26.57 percent of the American Indians and Alaskan Indians earn an associate degree. Since the number of students is small for the later two groups, caution should be used when interpreting these graduation percentages. These data indicate that SUNY completion rates differ by race and ethnicity for full-time, first-time students enrolled in an associate degree program. The purpose of this study is to describe the completion patterns of different racial/ethnic groups in response to NYS reporting requirements. It is not an analysis of the reasons or causes for persistence versus attrition in NYS public higher education. The literature suggests many other factors that could influence student persistence patterns at two-year institutions that were simply beyond the scope of this study. In particular, research on the role of student educational objectives, academic and social integration, student intentions to persist and quality of student, faculty and staff efforts could add to our understanding of persistence. This study, however, does provide a valuable description of persistence in SUNY institutions offering an associate degree.

Further characterization of the racial/ethnic distribution and graduation patterns of SUNY associate students enrolled in a postsecondary opportunity program is presented in Table 94/1187. As shown, there were 1,232 full-time, first-time students enrolled in an opportunity program in fall 1989. White (non-hispanic) students comprise 60.63 percent of the students from this group, followed by Black (non-hispanic) students (22.00 percent), Hispanic students (9.98 percent), Asian and Pacific Islanders (4.06 percent) with the remaining groups contributing less than one percent to the total cohort size.

The overall completion rate of full-time, first-time opportunity students entering in fall 1989 is 27.52 percent after four years. Students reported as White (non-hispanic), Black (non-hispanic) and Asian and Pacific Islander earn a higher number of degrees, i.e., 28.78, 28.41 and 28.00 percents, respectively, while Hispanic students earn a lower number of degrees (22.76). The data illustrate that the completion rates are lower for opportunity students than for all students from this cohort with the exception of Black (non-hispanic) students. The completion pattern for this opportunity group (28.41 percent) are nearly seven percent higher than the graduation rates of all Black (non-hispanic) full-time, first-time students (21.61 percent) entering the University in fall 1989. The completion rates of opportunity students from the remaining groups are lower by

10.65 percent for White (non-hispanic) students, 12.1 percent lower for Asian/Pacific Islander students and 3.78 percent difference for Hispanic students.

These percentages reflect the average of all SUNY associate degree programs and conceal the broad range of completion patterns by race and ethnicity for individual SUNY institutions. If such information is desired, then further examination of the graduation data presented in Tables 94/1186 and 94/1187 is recommended.

GRADUATION AND ATTRITION DATA FOR SUNY ASSOCIATE TRANSFER STUDENTS

As Table 94/1556 indicates, 6,295 full-time, transfer students entered a SUNY Associate Degree Program in fall 1989. Four years after admission, 43.43 percent (2,734 students) from the transfer cohort earned a degree, nearly 30 percent of the graduates or 12.71 percent of the original cohort transferred to another institution after degree completion. As shown, most of those degrees were earned during the second year after admission (24.89%), while 7.51 percent of the degrees were completed during the first year and eleven percent took more than two years to graduate after transferring to a SUNY Associate Institution.

The partial cohort data in Table 94/1556 estimates the first, second, third and fourth year attrition for the full-time, transfer cohort. Students leaving the University without a degree from the fall 1992 transfer cohort provides an estimate of first-year attrition at forty percent. Roughly, another ten percent drop-out during their second year, bringing the cumulative total to approximately 51 percent. The attrition rate slightly increases over the next two years to nearly 53 percent four year after transferring to a SUNY Two-Year Institution.

Caution is needed when interpreting these data since several cohorts were examined at one point in time to estimate the completion rates of one cohort at several points in time. Be advised that the transfer status figures underestimate the actual graduate and attrition transfer rates due to the incomplete reporting of this information. A further caveat of the data is that most SUNY institutions provided estimates for the transfer status and thus, the percentages may underestimate or exaggerate the actual number of students who transfer after graduating or leaving without a degree. Furthermore, the graduation and attrition rates are averaged across all associate programs within the SUNY system and differ for individual campuses as further examination of Table 94/1556 will demonstrate.

PART THREE - SUMMARY OF SUNY BACCALAUREATE GRADUATION TRENDS

Part Three includes attrition and retention trend information for full-time, first-time students in a SUNY Baccalaureate Degree Program entering in fall 1973 (Class of 1977) through fall 1989 (Class of 1993). Both descriptive and percentage data are presented in a cumulative format from a SUNY-wide perspective, by institutional type and by institution. For a complete description of the trend table format and column headings see the Organization of Attrition/Retention Trend Data on page xii of this Introduction and for data source documentation see the Diagram of Baccalaureate Trend Data on page xiv.

An examination of the history of SUNY baccalaureate degrees granted within four years for full-time, first-time students indicates that, in general, the percentage of students who earn a degree within the traditional, four-year period declined through the 1980's and has steadily increased since that time. As shown in Table 94/1495, the four-year graduation rate for baccalaureate students generally decreased from a high of 46.23 percent for the class of fall 1977 to percentages ranging from 41.5 percent for the class of fall 1980 to 36.33 percent for the class of fall 1990. Since fall 1991, the four-year graduation rates have steadily increased to 41.90 percent for the class of fall 1993. A review of the remaining graduation data indicates that SUNY students continue to earn degrees in increasingly larger numbers five and six years after enrollment.

The number of full-time, first-time students graduating after five years has steadily increased during the 1980's from approximately nine-to-ten percent during the early part of the decade to thirteen-fourteen percent as the decade closed to an average of seventeen percent in the most recent years. Degrees earned during the sixth year after enrollment have risen also during the last decade, from approximately two and three percent to the current high of four percent for baccalaureate graduation. Overall, the trend data reveal an increase in University graduation during the 1990's for full-time, first-time Baccalaureate students. In general, the four-year completion rate is increasing from a steady decline in the eighties; degrees earned in the fifth and sixth year continue to rise, bringing the University's current baccalaureate graduation rate to nearly 59 percent after six years. For a comparison of SUNY and national baccalaureate graduation, see Table 92/1345 on page xxix.

It must be remembered that these graduation rates represent average completion percentages for all full-time, first-time students enrolled in a baccalaureate program within the SUNY system. Graduation rates differ for individual SUNY campuses and by institutional types as further examination of Table 94/1495 will reveal.

PART FOUR - SUMMARY OF SUNY ASSOCIATE GRADUATION TRENDS

Part Four summarizes attrition and retention information for full-time, first-time students enrolled in a SUNY Associate Degree Program entering in fall 1975, (Class of 1977), through fall 1991, (Class of 1993). Both headcount and percentage data are presented in a cumulative format from a SUNY-wide perspective, by type of institution and by institution. For a complete description of the trend table format and column headings see the Organization of Attrition/Retention Trend Data on page xii of this Introduction and for data source documentation see the Diagram of Associate Trend Data on page xv.

A review of the history of associate degrees granted within two years for full-time, first-time students indicates that the percentage of students who earn a degree within the traditional period has declined. As shown in Table 94/1487, there is a decline in the number of associate degrees earned within two years, from 37.70 percent for the Class of 1977 to 16.37 percent for the Class of 1993. An evaluation of the remaining degree data indicates that during the third year after enrollment student completion rates have increased, from approximately seven percent in the early years to almost 14 percent for the more recent classes. As shown, another three to four percent of the students earn an associate degree during the fourth year. While there has been growth in the number of associate degrees earned during the third and fourth years of enrollment, in general, the trend data demonstrate a decline in the total number of SUNY Associate Degrees earned by full-time, first-time students from the Classes of 1977 through 1993.

There are many reasons why a student may decide not to complete a degree program that are beyond the scope of this study. The research indicates that the student's educational objectives and intentions to persist along with his/her integration into the academic and social aspects of the institution, combine with pre-college characteristics and employment status to influence persistence patterns at two-year institutions. The purpose of this study, however, has been descriptive, and it provides a valuable perspective on persistence patterns over time in SUNY two-year colleges.

It should be noted that graduation data presented above represents the average completion rate for all full-time, first-time students enrolled in an associate program within the SUNY system. Graduation rates differ for individual SUNY campuses as further examination of Table 94/1487 will demonstrate. For a comparison of SUNY and national associate graduation data, see Table 92/1345 on page xxix.

COMPARISON OF NATIONAL AND SUNY BACCALAUREATE AND ASSOCIATE GRADUATION DATA

COMPARATIVE NATIONAL AND SUNY BACCALAUREATE AND ASSOCIATE DEGREE GRADUATION RATES

INSTITUTION OF INITIAL ATTENDANCE AFTER HIGH SCHOOL	BACCALAUREATE ATTAINMENT AFTER SIX YEARS
NATIONAL	
PUBLIC FOUR YEAR	
ALL STUDENTS	44.9%
WHITE	48.0%
BLACK	25.6%

HISPANIC	24.9%
ASIAN/AMERICAN	39.0%

SOURCES: NATIONAL DATA – "DIGEST OF EDUCATION STATISTICS 1991", NCES 91–697, U.S.D.O.E., OERI, WASHINGTON, DC, TABLE 287.
SUNY DATA: – SUNY OIR SURVEY OF ATTRITION AND RETENTION

NOTE: THE NATIONAL DATA IS A LONGITUDINAL STUDY OF THE HIGH SCHOOL CLASS OF 1980 AND THEIR COMPLETION RATES AS OF SPRING 1986 FROM ANY COLLEGE AND THEREFORE INCLUDES STUDENTS WHO COMPLETED THEIR STUDIES AT A COLLEGE DIFFERENT FROM THEIR COLLEGE OF INITIAL ENROLLMENT.

THE SUNY COMPLETION RATES ARE AT THE COLLEGE OF INITIAL ENROLLMENT, A MORE RESTRICTIVE CONCEPT. THEREFORE THE SUNY RATES, IF THEY INCLUDED COMPLETIONS FOR THIS COHORT OF STUDENTS AT ANY COLLEGE WOULD BE EVEN HIGHER THAN THE RATES DISPLAYED HERE.

ALTHOUGH NOT DISPLAYED IN THE NATIONAL DATA HERE, BACHELOR'S DEGREE EDUCATIONAL ATTAINMENT FOR ASIAN AMERICANS AS A PERCENT OF ALL HIGH SCHOOL GRADUATES, IS THE HIGHEST OF ALL GROUPS AT 27.3 PERCENT COMPARED TO 18.2% FOR ALL GROUPS.

INSTITUTIONAL RESEARCH
STATE UNIVERSITY OF NEW YORK
SEPTEMBER 22, 1992

Table 92/1345 compares SUNY to National baccalaureate and associate graduation data. As shown, 55.8 percent of SUNY full-time, first-time baccalaureate students graduate from their initial SUNY colleges of enrollment after six years, whereas only 44.9 percent nationally graduate from public, four-year colleges. The national figure includes students who graduated from any institution whereas the SUNY data only includes graduates from the institution of initial entry. When race and ethnicity are included, the average graduation rates for SUNY four-year institutions are better than the national statistics.

National associate degree completion rates show a similar pattern. The national graduation rate for the associate degree is 20.7 percent, while the SUNY rate is 36.3 percent. Again, the national rate includes graduates from any institution whereas the SUNY rate is limited to graduation from the college of initial entry. At the associate level, SUNY graduation rates by racial/ethnic groupings also compare favorably to the national figures, as indicated in Table 92/1345.

(1) Since the following State University of New York campuses have no first-time students enrolled in Baccalaureate Programs, they are not included in the table: Health Sciences Centers, Environmental Science & Forestry, Optometry, Technology at Utica/Rome and Veterinary Medicine. In addition, Empire State College is not included in the aggregated data, since racial/ethnic data were not available from this campus.

FOOTNOTES

[a] Original constituent institutions of the State University of New York at its establishment in 1948.

[b] Date of establishment as a state college or institution.

[c] Date of incorporation into State University of New York.

[d] As of July 1, 1975, New York City Community College and the other community colleges (not shown here) sponsored by the New York City Board of Higher Education were no longer a part of the State University of New York.

NOTE: Dates preceding date indicated for establishment as a state college or institution refer to institutional antecedents of the present college or university. These my have been private institutions or controlled by a governmental entity other than the state. Intermediate institutional developments such as other college affiliation or date of first baccalaureate program offering have been omitted for the sake of brevity.

*The Health Sciences Centers at Buffalo and Stony Brook are shown separately here from their respective core campuses.
